

Call for Demonstrations

Important dates

Expressions of interest due

29 September 2013

Notification of acceptance

14 October 2013

Main Conference

3–6 December 2013

Sponsored by

Exhibition and Demo Chair

Antonio Robles-Kelly

NICTA and ANU, Australia

ICCV is the premier international Computer Vision event comprising the main conference and several co-located workshops and short courses. ICCV 2013 will host demonstrations whose purpose is to give researchers the opportunity to showcase live demonstrations of their contributions.

Members of the computer vision community are invited to submit expressions of interest for demonstrations at ICCV 2013. These do not need not be limited only to papers that are to be presented at ICCV 2013. Researchers are encouraged to demonstrate the effectiveness of methods described in papers presented in the past conferences and in other venues, so long as they fall within the broad context of ICCV.

Prospective demo participants should fill out and submit an **expression of interest form** electronically. Please be advised that all of the presenters for accepted demos must be registered at the conference. If there are more applications than the available space allows, the time of submission of the complete application will be used for selection. The conference also reserves the right to select demonstrations based on the degree of appropriateness for ICCV.

It is also important to note that, nonetheless demonstrations can be made with the help of industrial partners, commercial products should be presented as part of the ICCV exhibits, rather than demonstrations.

Successful expressions of interest will be assigned floor space on a first-come-first-served basis taking into account the date of lodgement, *i.e.* the date in which the expressions of interest was received.
